DETAILED ACTION

1. Claims 1-14 are presented for examination.

Paper Submitted

2. It is hereby acknowledged that the following papers have been received and placed of record in the file:
 - a. **Preliminary Amendment** is received on 01/08/2002.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. **The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. It is not clear to examiner to determine the scope of the invention, therefore claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being vague and indefinite.**
6. All dependent claims are rejected to as having the same deficiencies as the claims they depend from.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Sundhar, US Patent Number 6,829,243, Hereinafter Sundhar.
9. Referring to claim 1-14, Sundhar has taught a computer network system which is implemented in H.323 protocol including clients, server, gateway, gatekeeper, and interfaces (Figure 1, Col 4 line 63- Col 5 lines 9, and Col 6 lines 30-36).
10. Referring to claim 1, Sundhar has taught a system of computers networked by means of the H.323 protocol or the SIP protocol, each of said systems including at least one Gatekeeper means and at least one each of server and client means for operating a client/server multi-user computer application, and, optionally, a firewall means provided with H.323 or SIP proxy, wherein client registration and authorization in the network are according to registration and authorization method of H.323 or SIP, c h a r a c t e r i z e d i n a user handling database means associated with said Gatekeeper means, and that each of said Gatekeeper means, server means and client means comprises a real-time codec having a common 11.323 or SIP interface , each of said codecs being adapted to co-operate with the respective Gatekeeper means, server means or client means (Figure 1, Col 4 line 63- Col 5 lines 9, and Col 6 lines 30-36).

11. Referring to claims 2-14, claims 2-14 encompass the same scope of the invention as that of the claim 1. Therefore, claims 2-14 are rejected for the same reason as the claim 1.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is reminded that in amending in response to a rejection of claims, the patentable novelty must be clearly shown in view of the state of the art disclosed by the references cited and the objection made. Applicant must show how the amendments avoid such references and objections. See 37 CFR 1.111(c).
